Order Pick-Up

Saturday, February 5th ◆ 9am-1pm

Where: 10014 SW Bank Road Vashon, WA 98070

These native bare root trees & shrubs have been selected for their qualities as attractive landscape plants as well as their ability to attract wildlife and thrive in our Puget Lowland soils and climate.

Conifers

DOUG FIR *Pseudotsuga menziesii*

\$12/bundle of 5

Soil: Moist/Dry

Sunlight: Sun/Shade

A rapid grower, Doug fir prefers full sun and well-drained soils. Once established, it can grow two to four feet per year and reach heights of 200 to 300 feet as old growth.

It provides excellent shelter for birds and wildlife, and won't suffer from deer browse.

Because it tends to drop branches in heavy winds, it should not be planted near homes or buildings.

WESTERN RED CEDAR *Thuja plicata*

\$12/bundle of 5

Soil: Wet/Moist

Sunlight: Full shade/part sun

This native conifer is aromatic, very long lived, and notably rot resistant. It is slower growing than Douglas fir and tolerates shade. Red cedar reaches heights of 200+ feet, and is an excellent species for wetland or riparian areas or for under-planting alders. It's large size is reason to plant away from buildings and septic systems.

WESTERN WHITE PINE *Pinus monticola*

\$12/bundle of 5

Soil: Moist/Dry

Sunlight: Sun/Part shade

This five needle pine has thin needled foliage that looks feathery from a distance. This medium sized pine reaches heights of 130+ feet, and is an excellent species for wetland or fairly open and dry slopes. This is a spectacular landscape tree with a light blue green appearance but needs lots of space. It can suffer from white pine blister.

Deciduous

GARRY OAK *Quercus garryana*

\$12/bundle of 5

Soil: Dry

Sunlight: Part Shade/Full sun

Also known as Oregon white oak is the only oak native to Washington. A majestic, slow growing tree reaching to 60 feet tall. Drought tolerant in many types of soils but also found along wetland and stream edges. The redish brown acorns eaten by jays, woodpeckers, squirrels and other small mammals.

Shrubs

NOOTKA ROSE *Rosa nutkana*

\$12/bundle of 5

Soil: Moist/Wet

Sunlight: Sun/Part Shade

This is the small, pink wild rose grows in a variety of open habitats including shorelines, meadows, thickets, streamside areas, roadsides and clearings. It is hearty in a variety of settings, but prefers full sun. It blooms from May to July to a height up to 8 feet.

OCEANSPRAY *Holodiscus discolor*

\$12/bundle of 5

Soil: Dry/Moist

Sunlight: Sun/Shade

Oceanspray is a medium to large shrub, with long arching stems and up to 15 ft tall. Tiny cream-white flowers are in lilac-like clusters that appear May-June. It does well on dry slopes and on a deciduous forest edge but can also stand alone as a feature plant in a garden. Full shade tolerant but note a slower growth.

PACIFIC NINEBARK *Physocarpus capitatus*

\$12/bundle of 5

Soil: Moist/Wet

Sunlight: Sun/Shade

Growing up to 13 feet in height, the reddish shredding bark and pom-pom white flower clusters from April-July. Ninebark prefers partial shade but tolerates full sun and does well in wet areas with course, medium, or fine semi-acidic soil. The fruit is a red pod. It provides food, cover and nesting sites for wildlife while not being a favorite of deer.

RED FLOWERING CURRANT *Ribes sanguineum*

\$12/bundle of 5

Soil: Dry/Moist

Sunlight: Sun/Part shade

Perhaps our region's most famous flowering shrub and a harbinger of hummingbirds in the spring. Flower color ranges from pink to bright red. Preferring open spaces, well-drained or even rocky soil, these plants may reach 9 feet or more. Fruit-loving birds favor the berries.

SWEET GALE *Myrica gale*

\$12/bundle of 5

Soil: Moist/Wet

Sunlight: Sun/Part shade

Sweetgale is a small deciduous shrub common to bogs and other peatlands. Its bluish, lance-shaped leaves are sweetly scented. It teams up with a bacterium in its roots that can fix nitrogen. Its fragrant, dark-green leaves and fruits (which attract birds) make it a good planting choice for wet areas of the garden. Catkins bloom into yellow flower clusters March-April and grow to a height of 3-6 feet.

TALL OREGON GRAPE *Mahonia aquifolium*

\$12/bundle of 5

Soil: Dry/Wet

Sunlight: Sun/Shade

A shrub widely used for its evergreen leaves; compact, upright habit; and ease of care. Purple fruit follows sulfur yellow flowers in early spring (the fruit is edible although very tart). This plant is good for shading out weeds without blocking views, as it is one of our few native evergreen shrubs that thrives in full sun and is drought tolerant and grows up to 10 feet.

VINE MAPLE *Acer circinatum*

\$12/bundle of 5

Soil: Moist

Sunlight: Part sun/Part shade

One of the most desirable native plants, this small tree grows to 25 feet and typically grows under other trees where some light reaches through the canopy. This deciduous shrub or small tree does well as an understory shrub making it ideal for diversifying the forest floor. It is also famous for its vibrant fall color.
